

FOR IMMEDIATE RELEASE

Configura Proudly Presents the Next Generation of Office Space Planning Software.

Configura Launches CET Designer

GRAND RAPIDS, Michigan – January 1, 2006 – After the successful introduction of CET Designer for kitchens in Scandinavia during 2004, Configura now introduces CET Designer on the North American office furniture market. The first office furniture manufacturer to support and provide its products for CET Designer is Haworth Inc., a global supplier of office furniture products.

CET Designer marks a new era for space planning software. CET Designer offers a complete solution for creating proposals, space plans and visualizations of commercial furniture and kitchen products. Just as importantly, the software makes the sales process error-free, more efficient and enhances the designer's ability to quickly and effortlessly learn new product systems.

CET Designer is one part of a more comprehensive concept called Configura CET. Other components in the CET concept are tools and portals for the development, marketing and distribution of extensions.
